**rotation and a proximal portion spaced closest to the axis of rotation," and clarify "wherein the proximal portion of the finger includes a thinned region defined by a recessed portion disposed on a side of the finger."**

With respect to the cited references, Applicant submits that these references, individually or in combination, do not disclose a method of processing sheet media as claimed in independent claim 1, do not disclose a media processing apparatus as claimed in independent claim 13, and do not disclose a method of processing sheet media as claimed in independent claim 28, with a finger having a proximal portion including a thinned region defined by a recessed portion disposed on a side of the finger.

In view of the above, Applicant submits that independent claims 1, 13, and 28, and the dependent claims depending therefrom, are each patentably distinct from the cited references and, therefore, are each in a condition for allowance. Applicant, therefore, respectfully requests that the rejections under 35 U.S.C. 102 and 35 U.S.C. 103 be reconsidered and withdrawn, and that claims 1, 3-6, 13, 17-20, 24, and 28-34 be allowed.
